

## At-Home Meteorology - Making a Rain Gauge

### What You Need:

- One empty 2-liter plastic bottle
- Scissors
- Pebbles
- Ruler
- Permanent Marker

### How to Make It:

- Cut the top off of a 2-liter plastic bottle
- Put a layer of pebbles at the bottom of the bottle
- Place the cut off top upside down in the cut-off bottle
- Starting from the bottom of the bottle - using a ruler - write measurements on the outside of the bottle.
